DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4, 6-7, 14 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Kubota et al (4893502). Kubota et al discloses the same invention as claimed: a rotation angle detection device characterized by comprising:a yoke member 23 which is formed of a magnetic material rotating in synchronization with a rotary shaft 3 and fixed to a nonmagnetic member 20 (Fe or Al) attached to the rotary shaft; a magnet 22 which is disposed with a predetermined space apart from the yoke member (22 bonded to 23, thus spaced apart from a bonding layer) in the axial direction and has a magnetic pole facing the yoke member on the axial direction edge surface thereof; and a magnetic detection element 24 disposed in a magnetic path which is formed by the magnet and passes through the yoke member. See Fig. 13. Although specific columns, figures, reference numerals, lines of the reference(s), etc. have been referred to, Applicant should consider the entire applied prior art reference(s).

Allowable Subject Matter

Claims 2-3, 5, 8-13 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Application/Control Number: 10/577,347

Art Unit: 2862

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dr. Bot LeDynh whose telephone number is 5712722231. The Examiner normally does not work on Fridays. The examiner can normally be reached on Maxiflex.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward Lefkowitz can be reached on 5712722180. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
